Career Objective:

To work in an environment that encourages me to succeed and grow professionally where I can utilize my skills and knowledge appropriately.

Executive Summary:

- Around 4 years of experience in full-stack development.
- Hands-on experience in AWS Cloud services, Node JS and React JS.
- Knowledge in version control tool Git Design & Development, JIRA.

PROFESSIONAL EXPERIENCE

Nov 2020 – present

FIRMINIQ Systems India Centre. 

Senior Software Engineer

Working on different Healthcare software products for our client OMRON

Jun 2018 – Nov 2020

SmartData Enterprises inc. 

Software Associate Delivery - Level II

Worked as full-stack JS developer

PROJECTS

Nov 2020 – present

Remote Patient Monitoring (Omron Healthcare) 

vitalsight

Aim: To create a system to let doctors remotely monitor patients' BP.

Technologies Used: NodeJS, AWS API Gateway, AWS Lambdas, DynamoDB, AWS Cognito, AWS SNS, AWS SES, React JS.

Responsibilities:

- Responsible for creating new Backend RESTful API and enhancing existing functionalities for all projects.
- I have used AWS Cognito to save all confidential information.
- I worked on AWS Lambdas and API Gateway for creating various APIs.
- Worked on Database DynamoDB.
- I implemented AWS Secret Manager for saving all confidential information.
- I used AWS SNS to send notifications to end-users.
- I implemented High charts for generating graphs in a report.
- Created event triggers on s3 and DynamoDB.
- I Worked on the Frontend application (React JS) for updating the component flow.

Nov 2020 – present

Internal Portal (Omron Healthcare)

Internal Portal

Aim: Find a solution to efficiently register/manage multiple patients/doctors and hospitals under a portal.

Technologies used: AWS Lambdas, Microsoft Excel, S3, DynamoDB

Responsibilities:

- Used s3 to trigger an event upon uploading a file.
- We used DynamoDB for saving user information.
- Applied Data validations in MS Excel.
- Mentored and trained recruits and lateral joiners in the team.

Jan 2020 – Dec 2020

The Canadian Load Board

Logistic

Aim: The Canadian load board cloud toolsets provide users with more than just a load board. Brokers, carriers, and other logistics service providers use our platform to digitize the RFQ process, match capacity, and build business networks.

Technologies used: Node Js, Express JS,Socket.io, Stripe, AWS, React JS & MongoDB.

Responsibilities:

- Responsible for creating the whole architecture for this app frontend and backend.
- Worked on the frontend for this app on React JS and used express js with MongoDB for backend in monolithic approach (On Ec2).
- Create a real-time dynamic lead generation page for brokers, which will update when another broker changes or adds any load.
- We created an Inventory management system.

Jan 2019 – Jan 2020

Kangaroo Propane

E-commerce & Stock management

Aim: It is an E-commerce website that sells propane gas tanks and delivery them to user locations. Users can track their order In Real-time on a map using IOS & Android apps.

Technologies used: Node Js, Express JS,Socket.io, Braintree, AWS, Angular 9 & MongoDB.

Responsibilities:

- Responsible for creating the whole architecture for this app frontend and backend.
- Worked on the frontend for this app on angular 9 and used express js with MongoDB for backend in monolithic approach (On Ec2).
- We created a Real-time order tracking system.
- We created an Inventory management system.

EDUCATION
